

**The Pension Fund Divestment Song:
Keep it in the ground!**

Melody: When I'm sixty-four - The Beatles

When I get older losing my hair,
Many years from now.
Will you still be sending me a monthly sum?
Enough to live on for years to come?

Will you look after my safety net?
Keep it safe and sound?
We won't be resting, 'til you start divesting
Keep it in the ground!

[instrumental bit]

Fossil fuels must go!
Oil, gas or dirty coal
To all these we say No!

Financing oil you're taking a risk
The bubble's gonna burst!
Funding fossil fuels is unexplainable
We have to go sustainable

Investments in gas, investments in coal
Are obviously unsound
We won't be resting, 'til you start divesting
Keep it in the ground!

There's only so much time to save the climate
Let's make a change, and do it now
Fossil fuels must go!
Oil, gas or dirty coal
To all these we say No!

Glaciers are melting, oceans will rise
Floods and droughts all round
Make my pension Parisproof and set the trend
We need leaders who'll take a stand

Give us your answer, make up your mind
Before we all have drowned
We won't be resting, 'til you start divesting
Keep it in the ground!

We won't be resting, 'til you start divesting
Keep it in the ground!

We won't be resting, 'til you start divesting
Keep iiit iiii in thee grououound!
